Using the Website

Browser Requirements

SKLDoc.com works with most web browsers. SKLDoc works best with Firefox 1.5 or higher but also works with Internet Explorer 6 or higher.

- **Note Regarding the Map Request Page:** To quicken response time on this page, we recommend the use of the web browser 'Firefox'. Firefox works great on uploading and maneuvering through the long list of plats available to view by County on this page. Firefox is a FREE download at <http://www.mozilla.org/en-US/firefox/features>. Some slowness may occur when using Internet Explorer 9. You may choose to use Firefox as your primary web browser OR use it only when you are on www.SKLDoc.com.
- **Note Regarding Browsing Images:** To see images on-screen, you'll need a TIFF image viewer plug-in. We recommend AlternatIFF. It is a FREE download at <http://www.alternatiff.com>. It is one of the free tiff image viewers that the US Patent and Trademark Office provides on their site. Many people have QuickTime installed, but this does not work well as an image viewer. You may see a piece of the image, too large to view conveniently on your screen.

Your SKLD sales team is here to help. Let us know if you need assistance in any way.

Viewing Documents

When you first log in to www.skldoc.com, you should see these controls at the top of the page.

County: <input type="text" value="Adams"/>	Reception: <input type="text"/>	Year: <input type="text"/>	<input type="checkbox"/> Book/Page	<input type="button" value="Submit"/>
--	---------------------------------	----------------------------	------------------------------------	---------------------------------------

This means you are on the “Browse Images” page, and you can get back here at any time with the

button at the far left, in the menu.

The “Reception” field is SKLD’s version of the county’s reception number. It’s usually the same, but in cases where counties have very long numbers or repeat numbers in a year the SKLD number will chop off some of the first digits. See [Appendix 1](#) for information about SKLD’s reception numbering.

If the document is found, you’ll see something like this (assuming you have AlternaTIFF installed):

County: <input type="text" value="Adams"/>	Reception: <input type="text" value="2213"/>	Year: <input type="text" value="2007"/>	<input type="checkbox"/> Book/Page	<input type="button" value="Submit"/>
<input type="button" value="Download as TIFF"/>	<input type="button" value="Download as PDF"/>	<input type="button" value="Prev Doc"/>	<input type="button" value="Next Doc"/>	
				
RECEPTION#: 2007000002213, 01/04/2007 at 02:11:15 PM, 1 OF 18, Doc Ty Carol Snyder, Adams County, CO				

Several new buttons appear:

- **Download as TIFF:** lets you copy the document, with all its pages, to your computer as a .tif file
- **Download as PDF:** lets you copy the document, with all its pages, to your computer as an Adobe PDF file.
- **Related deeds:** Links may appear to other documents filed with this one. We do not guarantee that all related documents are listed here, but we try to provide links between Warranty and Trust deeds that were filed by the same person on the same day, usually with adjacent reception numbers.
- **Prev Doc:** Jumps to the document with the previous reception number
- **Next Doc:** Jumps to the document with the next reception number

The next row of icons you see:  are actually part of the AlternaTIFF control. If you **do** see the “Download as Tiff” button, but you **don’t** see this row of icons, then you either have some other viewer installed, or maybe no viewer at all. The icons should be mostly self-explanatory; you can save or print the document with them, and that will happen faster and more conveniently than if you use the “Download” buttons above. You can also rotate the image and switch to other pages.

If the document is *not* found, you'll see something like this:

County: Reception: Year: Book/Page

Document not found: *Document Adams/21-2006.tif not present on server*
[Click here to report a missing document](#)

Other error messages such as, "Document not present on server" are possible. Reasons for this are; 1) You may have only purchased access to certain counties or date ranges and you are trying to view documents outside of these parameters, or 2) if some problem is occurring on SKLD's servers.

Checkmark all

Download as TIFs

Get as 1 TIF

Download as PDFs

Clear

After you've pulled a few documents, you'll begin to notice a list forming on the bottom left side of your screen. You can checkmark one or more of these documents and download them together as a group – all stacked together in a single tiff file (convenient for printing!), or as a zip file containing them as separate TIF or PDF files.

The Clear button is one way to clear this history list when it gets too big. It will also clear itself every night.

Note: Even if your history is cleared, you can still pull the same documents over and over again in the same calendar month, and you will not be charged for them more than once. The history list is just a convenient way to track what you have been doing.

Reporting Missing Images

When an image is missing you'll see a link, "Click here to report a missing document". When an image is present you'll see a link, "submit a problem report". Both links take you to the same place: the Scan on Demand Request Form.

If your image was hard to read, or if the wrong image came up, use this form to report the situation to SKLD. You will receive a reply, emailed back, regarding the status of your image.

Before submitting this report, we'd suggest that you first double-check the number, year, and county. Take a quick look at [Appendix 1](#) to make sure you've entered the right number range for that county and year.

Using Batches

The **Batch Request** button in the Menu pane takes you to the Batch Request page shown at right.

If you have a group of documents that you would like, and don't need to look at one-by-one in the "Browse Images" page, this feature allows you to list them all at once. The system will collect them all together while you continue to work on other things.

At the top of the screen you will see a list of batches you have requested: click "Details" to see their status; click "Edit" to change the batch and resubmit it; or click "Download" to download all the documents in a single package.

A batch is essentially the same as pulling documents one by one on the "Browse Images" page, then checkmarking them all in the history pane and downloading them from there. This goes a little faster and you can name your batch to keep track of them.

Recent Batch Requests

Request	Date	Status	Count	
Testing2	7/28/2011 5:30:58 PM	finished	4	Details Download Edit Delete

About Batch Requests

A Batch request lets you retrieve documents as a group instead of one at a time. The computer will process this request at a lower priority, but it should be ready within an hour. Please let us know if you experience a longer delay, or any other difficulty with a batch request.

Note: this form is not for reporting missing or unreadable images -- for that, please use the [Scan on demand page](#).

New Request

Enter a title for this batch request:

Submit

Requesting Maps

The **Map Request** button in the Menu pane takes you to the Map Request page shown at right. Although the entire form will not be visible until you select a county from the drop-down.

Once you have selected a county from the drop-down the page will reload with a list of maps in that county. The secondary drop down shows the sub-division name, recording date (if known), reception number (if known), the SKLD map ID, and the number of imaged pages. If any of those fields are blank it is because SKLD does not have that information. If the number of imaged pages is empty it means that SKLD does not have a digital image of that map.

To Submit a Map Request fill the form out with the pertinent information. The submission will generate emails to the email address you've provided in the "contact info" portion of the form. Each email will refer to your Map request ID and will contain a request ID number.

IF THE IMAGE(S) REQUESTED ARE FOUND in the SKLD library you will receive an auto-generated email informing you that it was found and the image will be attached to the email.

IF THE IMAGE(S) REQUESTED WAS NOT FOUND in the SKLD library you will receive an auto-generated email informing you that it was not found and your request was automatically forwarded to SKLD's scanning service department for imaging. Standard delivery time to complete this request is within 24 business hours but we always strive to complete it within a shorter time period.

WHEN SKLD'S SCANNING DEPARTMENT COMPLETES THE SCAN, you will receive an email informing you that the image is completed and it will be attached to the email.

Statistics

You can keep track of how many documents your company, and each user, has pulled by clicking

Usage Statistics in the Menu pane.

This shows the number of documents, and number of pages pulled for each month. If you click on a month, it'll show you the breakdown by user.

Note that the counts by user may not add up to the count by month: if two users pull the same document, it's only counted once in the Month category.

List of all docs retrieved by user mschneider2: [This month](#), [Last month](#)

List of all docs retrieved by group user3: [This month](#), [Last month](#)

Usage Statistics

Month	User	Documents	Pages
August 2011		1	6
	mschneider2	1	6

Users and Groups

If you have been designated as a Group Administrator, you'll have an **Admin** button in your menu pane. If you click on that, then on the **User Admin** button that appears, you'll see the User Admin screen:

Users for group group						
Add a new user						
test1	*****	group	Group Admin	enabled	500	Change Delete
test2	*****	group	User	enabled	30	Change Delete
test3	*****	group	User	disabled	51	Change Delete

You can add as many users as you'd like and change their passwords and monthly document limits. All of their usage will be counted together towards your bill; if two people pull the same document, it will *not* be counted twice.

Appendix 1: SKLD Reception Numbers

Enter the reception number of the document you would like to retrieve in the Reception number box, and the four digit year in the Year box. If your county puts the year at the beginning of the reception number, leave it off when putting it in the viewer (see below for exceptions in Douglas and Arapahoe). In addition, you need to leave off leading zeros. For example for the following reception number in Larimer County, you would leave off the "2001," leave off the "00", and enter 2807 in the Reception box, and 2001 in the Year box.

County: Reception: Year:

RCPTN # 2001002807 01/12/2001 08:26:00 # PAGES - 1 FEE -
